

Project 2: Site Structure

Rikki Nelson

July 18, 2011

I chose the Hybrid structure style. I plan to organize such that the primary hierarchal levels are based on the functions of the pages (Home, Resume, etc.). Mixed within these I will organize files by file type. To minimize duplication (and thus save on space), I plan for files that are common to multiple pages to be kept with the common root folder. This may mean grouping pages by a category, and thus create an extra (and potentially unnecessary) level in the hierarchy. I plan to initially attempt to “Keep It Simple, Silly” (KISS), but am pointing out that I am prepared to handle an issue I foresee (meaning that too many “common files” would make my structure seem sloppy).

Structure:

- ✚ Nels5117 (root folder)
 - Documentation (folder)
 - ❖ Project2SiteStructure (file)
 - Website (folder)
 - ❖ Home (folder)
 - CSS (folder)
 - Graphics (folder)
 - Pages (folder)
 - Cases (folder)
 - Graphics (folder)
 - Cases.htm (file)
 - Guestbook (folder)
 - Graphics (folder)
 - Guestbook.htm (file)
 - Interests (folder)
 - Graphics (folder)
 - Interests.htm (file)
 - Reflections (folder)
 - Graphics (folder)
 - Reflections.htm (file)
 - Resume (folder)
 - Graphics (folder)
 - Resume.htm (file)
 - Home.htm (file)
