## RELEVANT EXPERIENCE

**Internship, Web Development**, Your Home Northwest, Bothell, WA June 2016 – Present

- **Teamwork/Collaboration** – Worked closely with a colleague to help build a better understanding of the WordPress content management system.
- **Social Media Optimization** – Researched current trends and the social media presence of competing businesses to implement the ideal solution for the client.

**Internship, Web Development**, Washington Expungement Services, Seattle, WA April 2016 - Present

- **Project Management** – Worked to understand client needs and communicated regularly during website development and design.
- **Execution** – Built a customized website using the Joomla CMS to allow the client the ability to update website content without the need for a web developer.
- **Iteration & Customer Relations** – Progressively worked with Business Owner to decide on direction for design and functionality of website.

**Network Technician**, Comcast, Everett, WA October 2007 – September 2014

- **Network Analysis/Revision** – Performed a deep analysis of Edmonds cable system, fixing impairments and inconsistencies to raise network integrity from 80% to 99.4%. Documented new additions to the cable system and inconsistencies deemed unfeasible to repair.
- **Maintenance & Troubleshooting** – Responded to technician and customer reported network issues and damage from extreme weather conditions during normal business hours and after-hours while working on call.

**BEUC Team Manager**, AT&T Mobility, Bothell, WA April 2005 – July 2007

- **Documentation/Training** – Wrote and distributed documentation for an integral web application used by tier 2 technical support. Delivered training for the same application to new employees as needed.
- **Problem Solving/Debugging** – Fixed Visual Basic script written for MS Excel to import employee metrics. Management software for employee metrics was updated and would no longer import to Excel before fix.
